Étudiant Ingénieur en Cybersécurité avec expertise en développement Next.js et DevOps.

Summary

5th year Engineering student in Networks and Telecommunications, specialized in **cybersecurity**. My cybersecurity engineering profile requires mastering **modern web development** and **DevOps** to design and secure complete applications. Hands-on experience with **Next.js full-stack applications**, **TypeScript**, and **production-ready features**.
Objective: Leverage my Next.js development skills and **product-first thinking** to contribute to **maintainable software** and **polished user interfaces** in a **fast-paced startup** environment.

Education

National School of Applied Sciences of Fez (ENSAF)

Fez, Morocco

Engineering Degree - Networks and Telecommunications (Master's level) — *Sept. 2021 – June 2026*

- Engineering degree with **cybersecurity** specialization, including secure development and **software engineering best practices**.
- Skills in **full-stack web development**, DevOps and **code quality maintainability** (OWASP, API security).
- Expertise in **Next.js, TypeScript, React, Node.js**, databases (PostgreSQL) and cloud services (Supabase).
- Major academic project: Development and **shipping** of the **ENSAF ACADEMIA** platform in Next.js with modern architecture.

Professional Experience

ENSAF ACADEMIA - Collaborative Academic Platform

ENSAF - Major Academic Project

Full-Stack Developer - Academic Platform — *January 2025 - Ongoing*

- **Modern architecture:** Built and shipped complete project with Next.js 15 (App Router), TypeScript, PostgreSQL and Drizzle ORM.
- **Advanced features:** Secure authentication, role management, file upload, certificate system, polished user interfaces.
- **Complete tech stack:** React Query, Zustand, React Hook Form, Zod validation, TailwindCSS, ShadCN, Framer Motion animations.
- **DevOps and security:** Middleware, server-side validation, maintainable code quality, production-ready deployment.

University Hospital Center (CHU) of Fez

Fez, Morocco

Full-Stack Developer - SOC/SIEM Project — *June 2025 - August 2025*

- **Full-stack development:** Design and development of secure web interfaces with **performant and elegant interfaces** and REST API integration.
- **Modern architecture:** Implementation of complete stack with **maintainable software** structure, authentication and state management.
- **DevOps and security:** Deployment automation with Docker, **code reviews** and secure **collaborative workflows**.
- **Service integration:** Development of **production-ready** APIs for SIEM/SOAR tools integration (Wazuh, TheHive, MISP).

SNRT

Rabat, Morocco

Developer and Network Architect — *July 2024 - August 2024*

- **Tool development:** Creation of network monitoring applications with **intuitive user interfaces** and **product sense**.
- **Automation:** Scripts and automated management tools with **performance optimization** and **maintainability**.
- **Application security:** Secure development with **code quality** standards and protection against web vulnerabilities.

National School of Applied Sciences of Fez

Fez, Morocco

President of SECOPS Club — *September 2024 - Present*

- **Tech project management:** Coordination of web development projects with **ownership** and collaborative **team discussions**.
- **Technical training:** Leading workshops on secure development, **software engineering best practices** and DevOps.
- **Collaborative development:** Supervision with **Git and GitHub workflows**, **pull requests** and **code reviews**.

Skills

Frontend Development	Next.js 15, React, TypeScript, JavaScript, TailwindCSS, ShadCN, Zustand, Framer Motion
Backend Development	Node.js, Server Actions, REST API, PostgreSQL, Supabase, Drizzle ORM, TurboRepo monorepo
DevOps & Tools	Docker, Git/GitHub workflows, pnpm/npm, Vercel, Linux, Pull Requests, Code Reviews
Web Security	OWASP, Authentication (Supabase Auth), Validation (Zod), Middleware, Secure sessions
Libraries & Frameworks	React Query, React Hook Form, Zod validation, Recharts, Nodemailer, Lucide Icons, Sonner
Soft Skills & Mindset	Product-first thinking, Technical perspective, Ownership, Fast-paced startup environment
Languages	French (Native), English (Excellent - Technical communication), Arabic (Native)
